Representative Powers Tells House Farm Products Should Go Direct to Consumer

#### Appeals for the farmer

Advocating the establisment of a parcels post which will permit the handling of farm products over mail routes, Mr. Powers declared that 'the farmer onght to have the right to send his produce direct to the consumer, instead of having it go through a dozen bands before it reaches the table of the consumer."

The Kentucky Representative expressed the hope that the commision which it is proposed shall be created to investigate the subject of an unlimited parcels post "may devise some means to extend the system so as to benefit the farmer and consumer by permitting the handling offarm products in large quaatities."

The post office appropriation bill authorized the establishment of an experimental parcels post on rural mail routes for a period of two years. It also provides for a general parcels post, applicable to all routes, with a package limit of eleven pounds, at the rate of 12 cents a pound. Mr. Powers took issue with the contention that the lower rate accorded strictly rural route shipments discriminated in favor of the farmers. The hand would be shorter, he said, and the rate of five cents a pound for the first pound and two cents for each additional pound up to eleven pounds on rural route shipments was justified. He deprecated the fact that the bill did not provide even more liberal treatment for shipments originating and delivered on rural routes.

Reterring to the proposition to establish a general parcels post Mr. Powers said:

"There are twenty-three foreign nations which now have a right to tranemit in our mails fourth-class packages up to a weight of eleven of 12 cents a pound. It is proposed and reasonable as those accorded these twenty-three foreign nations," -New York Tribune.

A girl was riding toward Holcomb, riding like the wind on a wiry pinto. Behind her was an escort of four Ysqul maidens, who did not display

the grace and ahandon of their leader. She brought her horse up standing within a few feet of Holcomb's own, and the adventurer say that she was not Indian at all, hut pure Spanish. Her creamy, ovel face, full scarlet lips and eyes like pools of black water made her very attractive.

The black eyes appraised Holcomb awiftly. He sat his horse like a cowhoy, but the pack animal behind was laden with the outfit of the prospector. He was bronzed by hot suns, and his handsome (see carried an expression of hold fenrlessness that just escaped

'Senor," she said shruptly in Spanish, "don't go to the 'Three Spears." 'Why?" demanded llolcomb sbruptly. For an instant his eyes sought the shimmering southwest, where three slender peaks arose from the gray of the desert into the hard blue of the

sky.
"Danger!" With the single word the girl wheeled her horse shruptly and set off at a gallop toward the river with her cavelcade. Their goal was a herd of cattle which was straying from the vicinity of the settlement.

liolcomb, pondering, rode on to the Yaqui town. It was situated near the only water within forty miles, a stresm sunk deep in a cleft of the rocks. It was far below the level of the half desert prairie that stretched sway to the mountains. The huts and tents of the town were grouped on a shelf just above high water.

Twoscorc yards below the town, near where the women were washing clothes, the river dived into a deep orifice in the mountainside. Running at right angles with the stream was a

Picking hia way down to the river, along a trail steep and dangerous, Holcomh replenished his water supply, bought meal of the sullen Indians, and set out on his way to the west again. As he climbed to the plateau a chief halted him with upraised hand—a tail man with stern brown face and nnrrow eyes.

"The stranger must not go to the "Three Spears," he grunted.

Holcomb returned the hostile gaze with calmneas. He rolled a husk cigarstte, lighted it and shook the reins "I heard you, chief," he snawered. Tha Indian stepped ungraciously saide.

An hour later Holcomb noted four dots on the northern horizon-two mounted Yaquia with pack horses, awinging out and ahead of him in a wide half-circle.

Holcomb was up next morning at the earliest break of dawn, for the "Three Spears" were less than a day's journey away and he was anxlous to rssch them. At noon, when he stopped for a hasty lunch, he was within the mouth of the defile which led to the higher fastnesses.

He was tigthening the cinch of his horse, for the trail ahead was steep and narrow, when a sound caused him to wheel. The Spanish girl of the day before was coming toward him.

Her thin dress was torn and her moccasina were cut to shreds. There were angry bruises on her bare arms and ahs limped as she walked.

"You must go hack!" she cried urgently in Spanish; "the 'Three Spears' mean death"

the boys do it in play.
"It was very dark, and the current is swift. Sometimes I struck upon the rocks, hat the dear Virgin protected mo, and I came into the hlessad sir again. After one passes through the mountain there is a secret path, much shorter than the horse must take, to the 'Three Spears.' So I was in time to warn the senor."

Holcomh seized the girl's hands impulsively in his own. "You did that for me?" he saked wondsringly. "But you wers hurt-you must have been injured on the cruel rocks."

"No," she replied; "n fsw bruises. They are nothing. And I did it for myself, too, senor. I wanted to he free

"My name la Isabella de la Barro, hut father called me 'Chiquita.' " 'Chiquita'-that means 'little ons.'

Chiquita it is!" They found the hidden animals without trouble. The pack animals wera laden with food, and with water in skins. This, explained Chiquits, was hecause the two Yaquis wers going on a search for poorly-guarded cattle after Holcomh had been disposed of and his

belongings appropriated. The girl swung into the saddle of one of the horses, and they were off. By sundown they had put several miles between themselves and the dangerous "Three Spears." Chiquits cooked auppe, on the fire which Holcomb built, and never had the prospector tasted a mesl more delicious.

Holcomh treated her as he would have his sister treated under similar circumstances. At night she slept the sleep of innocence and honeat fatigue In his one blanket, while he shivered and dozed, since it grew chill when the sun went down.

Misa Bah Ellerton sat down and

healthy, good-looking girl of eighteen does not weep just for the fun of pulling her own nose as her tears fail. Miss Bab had cause—great cause. Her cat was dead.

There is no particular way to describe a dead cat except to say that she was loysl and faithful, a good mouser and her name was "Pink." She had heen a cst for several years and had got used to it, and she knew that she was beloved by Miss Bah. That love was returned. Never had that cat given the girl an hour's uneasiness. Forty roda down the highway was a grove of beeches. It was a quiet, restful spot. Now and then an auto went honking hy, but as a dead cat is not too particular, "Pink" would sleep there without waking. With the spads in one hand and the suit case in the other, Miss ilsb made her way to the grove. She did not have to look long for a spot. Where the violets bloomed and the green leaves cast their shade she dug the grave, or sha had begun to when there cama an in-

"But you don't think ma silly?" she anxiously saked.

"Not a bit of it. Lord, miss, but if the colife dog I've got now should die I'd sure put up a headstone for him and sing a hymn over his grave. 1 auppose you live in the white house hack there? I'll carry the spnds and aultcase. Don't wesp sny more over the cat. You've done all you could

"That young man!" "He just came nlong."

"And he dug the grave for poor 'Pink?'"

"And he was so kind and gentle about it." "Yes, ao kind and gentiel"

#### WONDERFUL SAVING OF LIFE

Modern Sanitary Messure Have Cut the Death Rate of Chicago Almost In Hsif, Statistica Show.

Modern sanitary menaures and preventive medicins (which means no medicine at all) are chiefly responsihle for nearly doubling the average length of human life in Chlcago, and that within only one generation.

This statement is clearly borne out hy statistica published by the Chicago Health Department, and is only alightly less true of some other localities. But the hald statement does not suffi ciently convey the whole truth. Look at the figures: An average death rate in Chicago during the whole forty years previous to the last decade of 21.9 per thousand of population. During the past ten years the average has been only 14.7. This means a saving of 124,421 lives, for the ten years, or 12,442 per yesr. That is, there were just that many leas deaths from all causes than there would have been under former messures and methods.

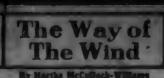

Does not that make the work ap

pear worth while? Nothing la plainer than that education of the people, combined with a willingness on their part to do the best they know how, in the various ways of taking hatter care of themselves, is the main source of this splendid result. The greatest saving of life has been among those diseases most affected by sanitary administration and control.

A still better atory is to be told. If the people will do as the Health Department teachea there will be atill greater saving during the next ten

No girl of spirit could endure that -not even though she knew the renl root of the matter wore trousers and answered to the name of Ellis Benson. He had been wandering three full years, which in their passing had transformed Harriet and Mildred, the pig-tailed pair he had loved to pet and tesse, into full-ficdged young women. He had brought them atrings of heads-turquoise for fair Mildred, coral for dark Harriet—and had not dreamed of anything but clasping the strangs about youthful throats, and taking kisses in reward. When he had actually made the gifts, presenting them atiffly, albeit his eyes twinkled, he had laughed lnwardlyperhaps at his own former folly.

He liked thom if they had grown up—and very nearly equally. But since Harriet had so much, Milly so little,

he was rather inclined to do more for her. His kindly preference had set Harriet wild. All along she had had her mind aet on marrying Eilis Benson. She was tired of the rich and hushand who would take her out into the thick of things. Further, as sn only child and helress, she had grown up rather spolled, to think that the best of everything was her due. Mildred's charm for her had lain in a certaln loving generosity, which made her not merely willing but eager to give Harriet, in everything, the first place.

Benson had come home in midsummer. In September he had gons away for a while. Now in late October his aunt Mrs Lane, mistress of Eins the show place of the neighborhood, was giving a garden party, which ahe called her chrysanthemum show.

Ellia was coming back for itmuch everybody knew. Therefore Harriet had ordered three new frocks for it, partly because she could not make up her mind as to one, partly also by way of triumphing over Mildred, who could do no more than make over her grandmamma's pink brocsde. Time had soltened it and. thanks to hobble skirts, the pattern was ample. When at last the frock waa finished, touched here and there with cohweh yellow lace, and wonderfully fitted to Mildred's lissome slimness, it had truly an nir of Paris all the more that she had put into it the veriest glints of blue, exactly matching her string of turquolaes There was just a hint of the sama hiue smid tha fluffy feathers of her wide-hrimmed whits hat. Altogsther, when at last she was ready to go. Anne was not far wrong in aaying, with a regretful sigh;

"It's a shams to let you waste yourself-looking as you do-but you always were too hard-headed for any-

thing." The middle path, the ahort cut to Elha, ran squarely into the main driva as it curved in from the highway. The nath led over a sille in hedge, cunningly hidden by tail shrubs. Mildred had got asfely over this stile, and was sattling herself to walk the rest of the path serenely, when the wind flew at her, almost wrenching off her hat, and wrapping her long coat so closely Thara was nothing for it but to go

his own amazement. He was thinking hard—Mildred bumped sgaiast him before he was fairly awara of her presence. He caught har gently in his arms, saying with a laugh;

"Has the sky fallen that I am oatching a larks"

ing a lark?" "Why! 1—it's the wind—and this—rubbish-y hat," Mildred panted, putting both hands up to straighten the brim of her hesdplece.

Ells surveyed it critically. "It is—not exactly a walking bat," ha said.
"Now—why didn't you wait for your fairy godmother's coach-and-sixty horse power? A car, making its own wind, can heat this small disturbance hands down."

"Fairy godmothers went out with Senta Claus," Mildred said, blushing faintly, but trying to ignore the undermeaning of his words.

He shook his head at her. "A skeptic," he said sorrowfully. "What nm I going to do about it? I want her asked, still clutching her hat. "But wait and tell me after I have found

shelter,' she added, making to walk on. The wind blew harder than ever. In her swathing skirt, she could barely mince, and even mincing she tottered. Benson stesdied her, made himself a shield, and ran on:

"One is-the resson I went away. Did you renlly believe it was huslness?"

"I didn't know," Mildrad sald simply-but her heart was beating fast. Benson looked down at her with a kindly quizzical smile: "It was—the greatest of all husiness," he said. "An

offort to—know my own heart."
"Indeed!" Mildred vouchsafed, drawing a little nway, in fear he might overhear the riot of her blood,

He nodded. "I need a wife," he said, dispassionstely. "I knew it-the minute I asw you—and Harriet. Both of you seemed exactly made for meyet, society ia so narrow, I had to choose-

"You were sure of us, I suppose!" Mildred Interrupted. He shook his head. "I was sure

of-nothing," he said. "Not all the time I was gone-I came hack as uncertain.' Here the wind took a stronger hand -blew and blew until perforce he

drew Mildred wall within his arms. The hiast drowned the purring of a motor moving so laggardly one knew it must very soon stop dead. Stop it did, just level with the pair; a voice from within said, with an underseid note: "Congratulations—if they are in or-

der." "They are," Benson said, gravely.
"At least I hope so," lifting Mildred'a
hand to his lips. In her ear he added: "Darling, the wind chose for me. The minute it flung you in my arms-l

knew."

Would Maks Sure of Death. Elsborate precautions against pre-mature interment were ordered in the will of Mr. Thomas Douglas Murray of Iver-place, Iver, Buckinghamahire, England, who died recently. The testator directed that on his apparent death his body should be kept in a well-warmed bed for 36 hours thereafter, and should then be placed in a coffin in a warm room with the windows partinly opened, and watched for four days and nights. During this period the tests give in a pamphiet, "The Signa and Proof of Denth," should be applied and during this perlod a hell should be attached to hia tranquil countryside. She wanted a wrist, which should be easily audible within and without the room. When decomposition had aet in a surgeon should completely sever the spinal cord high up in his hody, and his coffin should not be screwed down until the twelfth day after his death. His remains were then to be cremated. the ashes to be scattered to the four winds of heaven.

> Valuahis Pine-Nasdle Oil. As a result of the recent research work on the pines of Tasmanis and Australia, a pine-nsedie oil that has a medical value has been discovered. Another result is, perhaps, more lmportant. From the hark of the pine tree is obtained an exudation called sandarach, which is neeful for varnishes. From the pine bark the mussum experts have extracted 14 to 40 per cent. of tannin against the eight per cent. obtained in England from osk hark, and the) have damonstrated that the wood of the Australian mararie, plum, mountain ash, and giant gum is suitable for the manufacture

of golf clubs. An Exception. "That theatrical star declares sha

will have nothing to do with anything so gross as business details." "Humph! I notice she excepts the gross receipts."

Great daring and lngsnuity were recently displayed by a youth in making his escape from the Boratal Institution at Feitham, Wiltshire, England, where he had been placed on a charge of hurgiary. Wearing only a nightahirt, he squeezed between tha hars of the dormitory window, which were only 10 inches apart; lowered himself to the ground 30 feet below by knotted hlankets and n sheet, and scaled a high wall topped with barbed wife. He kept to the fields and twice saw the warders accouring the roads on hicyclea. Breaking into a farmhouse, hy forcing the iron bars of tha kitchen wrapping her long coat so closely window, he atole food and clothing, about her ahe could beraly move.
